JOB DESCRIPTION

ALGAL BIOMASS RESOURCES – THEIR DEVELOPMENT AND EXPLOITATION FOR BIOBASED FOOD, FEED AND NUTRACEUTICAL PRODUCTS.

We are seeking to appoint high quality independent early career researchers to join the Algal Biotechnology Research Group within the university who can develop their academic careers with us in any aspect related to the development and /or exploitation of algal biomass resources. Successful candidates will be appointed for a period of three years starting ideally no later than 1st March 2019.

Key elements of the selection process for the individuals will be their personal research track record; the novelty, viability and excellence of the three-year research project proposed by the candidate; the alignment of the proposed project with the strategy, interests and facilities in the Algae Biotech Group, and commitment to and potential for an academic career beyond the fellowship period.

For further details and information please contact Professor Patricia Harvey, contact details below. The advert will also appear shortly on the University of Greenwich vacancies website.

Deadline for applications is 5pm, Friday 25th January 2019
